

EZ Pads Specifications

EZ Pads Inc.
1618 Ridge Rd, Vista, CA 92081
(866) 397-2370

EZ Pads Inc. was the first manufacturer to identify the need for a pre-fabricated portable spa pad. Since 1999, EZ Pads Inc. has led the industry wide effort to produce a convenient and inexpensive alternative to pouring concrete for Portable Spa Installations.

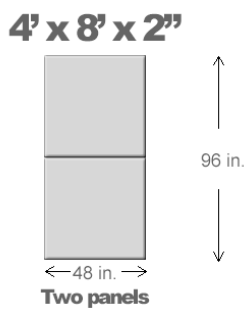

With hundreds of thousands of EZ Pads in use today, our efforts remain focused on our customer's needs. Daily interaction with vendors and consumers provides dynamic feedback, which generates thoughtful improvements.

EZ Pads are manufactured from HDPE (high density polyethylene) to ISO 9000 specifications. Each panel is blow molded to a high degree of precision so that fit and finish are excellent. EZ Pads are assembled with snap/screw in connectors which are robust enough that the assembled pad can be picked up and moved.

All EZ Pads are assembled from three parts: 4'x4'x2" panels, HDPE molded connectors, and #14 x 1" sheet metal screws.

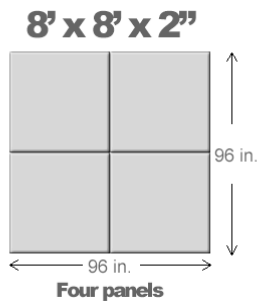

EZ Pads were tested by the Phillips Petroleum Laboratories to 5000 lbs. per square foot without failure, and tested to 140 degrees F. and minus 40 degrees F. under load without failure.

EZ Pads come in five sizes:

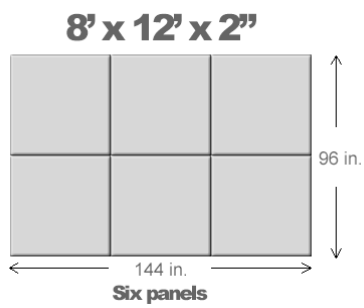

4'x8'

Consists of two panels, two connectors and four screws.

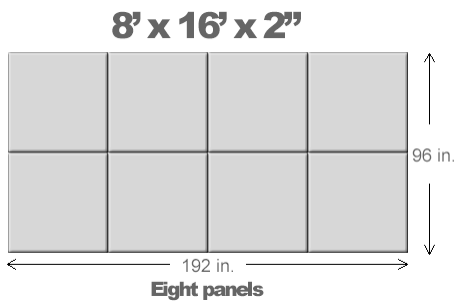

8'x8'

Consists of four panels, eight connectors and sixteen screws.

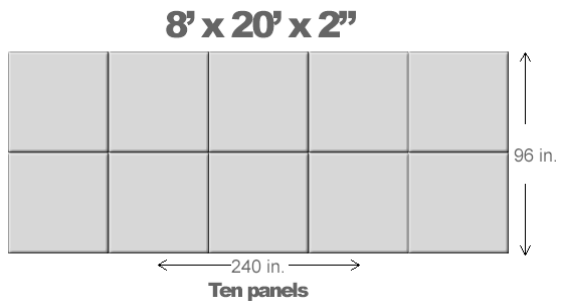

8'x12'

Consists of six panels, 14 connectors, and 28 screws

8'x16'

Consists of eight panels, 20 connectors, and 40 screws.

8'x20'

Consists of ten panels, 26 connectors, and 52 screws.

EZ Pads are manufactured by:

Western Industries Plastic Products L.L.C.

Blow molding experts with over 30 years of experience.
